Email : dave4ece@gmail.com
Mobile : +251-982101785

Personal Information

Date of Birth:12 September 1994
Nationality: Ethiopian
Gender: Male
Location: Addis Ababa, Ethiopia
Languages: English, Amharic

Education

Jimma University Jimma, Ethiopia
BSc. in Electrical & Computer Engineering (Spec. in Electronics Communication. Engineering);Sep 20011 – July 2016

JNTUH University Hyderabad, India
M.Tech in Communication Engineering (Spec. in Systems & Signal Processing); *August 2018 – August 2020*

Experience

Mizan Tepi University Mizan Aman, Ethiopia
Ass. Lecturer *Nov 2016 - August 2018*

- **Teaching**: Teaching undergraduate students and implementing innovative teaching methodologies.

Mizan Tepi University Mizan Aman, Ethiopia
Lecturer *May 2020 - present*

- **Teaching & STEM Center Coordinator**: coordinating and managing Mizan-Tepi University STEM Centre by conducting short-term and long-term training on electronics, Robotics, Computer programming & IOT for high school students.

- **Developing Mobile and Web Applications**: Developing mobile applications using the React Native framework, working for both Android and iOS platforms, and developing an official website for the company.
- **Network Design and Analysis**: implementation of different network technologies, including wireless communication ad hoc network, MANET, VANET, VEINS-INET using MATLAB, ns3 & omnetpp
- **Machine learning and Data Science using Python**: Developing and implementing machine learning models and data analysis end-to-end implementation for different problems.

Projects

- : Design and Implementation of Acoustic Echo Cancellation on Xilinx Zynq for FPGA Co-simulation using LMS Adaptive Filter.
- : Hierarchical Adaptive Congestion Control Using Hybrid Congestion Index Fusion for Reliable Beacon Dissemination in VANETs.
- **web-Based data collection for ARC**: web-based big data collection and manipulation site for the Agricultural Research Center (ARC), built with React and Node.js
- **Truck Managment System**: Developing Full stack truck managment system which allow users to find a local truck for means of materials and goods transportation .

Programming Skills

Programming Languages: Python, MATLAB, Java, SQL, MySQL, C/C++, JavaScript.
Technologies: Machine Learning, GNN, Raspberry Pi, OMNETPP, NS-3, Arduino, NodeMCU, ESP32, React Native, ReactJS

Publications

- **Design and Implementation of Acoustic Echo Cancellation on Xilinx Zynq for FPGA Co-simulation using LMS Adaptive Filter**: International Journal of Scientific and Research Publications
